GHULAM QADIR

Full Stack Engineer | Node.js & React | AI / RAG Systems | REST API & Database Design

Location Lahore, Pakistan **Phone** (+92) 305 7705617 **Email** mohammadghulam.qadir@gmail.com
LinkedIn linkedin.com/in/mghulamqadir **GitHub** github.com/mghulamqadir **Portfolio** mghulamqadir1.vercel.app

PROFESSIONAL SUMMARY

Backend-focused Full Stack Engineer with 3 years of professional experience building production SaaS platforms, AI-powered applications, REST APIs, payment systems, and scalable backend services. Experienced with Node.js, Express.js, FastAPI, PostgreSQL, MongoDB, Supabase, React, and Next.js, with hands-on expertise in Retrieval-Augmented Generation (RAG), LLM integrations, vector search systems, authentication, payment workflows, third-party API integrations, and background job processing with Redis and BullMQ.

Strong background in backend architecture, API design, database modeling, AI application development, cloud deployment, performance optimization, and building maintainable production-ready software systems.

TECHNICAL SKILLS

Languages	JavaScript (ES6+) · TypeScript · Python
Frontend	React.js · Next.js · Redux Toolkit · Tailwind CSS · HTML5 · CSS3 · React Hooks · Responsive UI · Component Architecture
Backend	Node.js · Express.js · FastAPI · REST APIs · Microservices · Modular Architecture · API Design · BullMQ
AI & LLM	RAG · LLM Integration · Vector Embeddings · Vector Search · Prompt Engineering · AI Chatbots · Qdrant · Perplexity API
Databases	PostgreSQL · MongoDB · Supabase · Redis · Database Design · Query Optimization
Payments	Stripe · Stripe Connect · Plaid · Google Pay · In-App Purchases
Cloud & Tools	AWS EC2 · AWS Amplify · Docker · Vercel · Railway · Render · Git · Postman · Swagger/OpenAPI · Unit Testing · API Testing

PROFESSIONAL EXPERIENCE

Backend Engineer — Zweidevs Private Limited, Lahore
Aug 2025 – Present

- Develop production backend services and REST APIs using Node.js, Express.js, PostgreSQL, Supabase, and MongoDB.
- Build AI-powered applications using RAG pipelines, vector search, LLM integrations, and structured AI workflows.
- Develop backend solutions for SaaS and healthcare applications involving data processing, user management, AI-generated outputs, and secure API communication.
- Integrate third-party services including payment gateways, Perplexity API workflows, authentication systems, and external APIs.
- Support cloud deployment, debugging, testing, and production issue resolution.

Backend Engineer — Cinqdev Solutions, Lahore
Dec 2024 – Aug 2025

- Developed backend and full-stack applications using Node.js, Express.js, React.js, FastAPI, PostgreSQL, and MongoDB.
- Built AI chatbot and document-processing systems using RAG pipelines, LLM APIs, vector databases, embeddings, and prompt workflows.
- Implemented RBAC, authentication systems, modular backend architecture, and secure REST APIs.
- Designed database structures and optimized workflows supporting user management, CRM integrations, and business operations.
- Integrated third-party APIs and collaborated with frontend teams to deliver complete production features.

Node.js Developer — StepInn Solution, Lahore
Dec 2023 – Nov 2024

- Developed REST APIs using Node.js and Express.js for web and mobile applications.
- Designed MongoDB schemas and optimized database structures based on application requirements.
- Improved backend reliability by resolving API errors, database issues, and performance bottlenecks.

PROJECTS

Renyx — AI-Powered Surgical Coding Platform
Backend Engineer cardio-dev.renyxai.com

- Built an asynchronous report-analysis pipeline in Node.js and MongoDB, with Redis and BullMQ workers.
- Designed OpenAI evidence extraction with quote validation, plus Qdrant retrieval of CPT and ICD-10 candidates.
- Delivered JWT-secured REST APIs with Zod validation, status polling, and retryable analysis runs.

Alevo — AI-Powered Coaching Platform
Full Stack Developer app.alevo.ai

- Developed backend services powering AI coaching experiences, user management, content processing, and application workflows.
- Built LLM-powered processing pipelines and integrated AI functionality into production backend systems.
- Implemented APIs, third-party integrations, and Stripe payment workflows supporting platform operations.

CampGenie — Camp Discovery & Booking Marketplace
Backend Engineer thisiscampgenie.com

- Developed marketplace workflows for camp discovery, sessions, registrations, capacity management, bookings, and role-based users.
- Designed APIs and database structures supporting families, providers, users, and platform operations.
- Implemented Stripe Connect marketplace payments and built application functionality using Next.js and Supabase.

CrowdAxis — Marketing Intelligence Platform
Backend Engineer www.crowdaxis.co

- Developed backend functionality for event research, audience intelligence, campaign analysis, and AI-generated insights.
- Built Perplexity API-powered AI pipelines for retrieving, processing, and structuring market data.
- Integrated third-party APIs, payment workflows, and backend services supporting marketing intelligence solutions.

Real Time Call Center — Call Reporting & Analytics Platform
Backend Engineer westlakeoc.org

- Built a Node.js and MongoDB backend ingesting ReadyMode CDR files via SFTP and syncing CallTools calls.
- Delivered JWT-secured reporting APIs for dials, connects, and transfers, plus DID-pool Excel import.

Klippify — Creator & Brand Performance Platform
Backend Engineer klippify.com

- Developed backend architecture supporting creator campaigns, verified engagement tracking, analytics, earnings, and platform workflows.
- Built REST APIs, database structures, social integrations, click/view tracking systems, and Stripe payment functionality.
- Designed backend workflows for scalable campaign management and performance-based creator payments.

CERTIFICATIONS

Complete AI Hackathon
lablab.ai · Feb 23 – Mar 2, 2026
ID: CMMKL3UIS00074X0SSCUTRBEB
View Certificate ↗

Launch and Fund Your Own Startup-Edition 1
lablab.ai · Feb 6 – 15, 2026
ID: CMLRXUWJQ003D700SKNRZIBP1
View Certificate ↗

Deriv AI Talent Sprint
lablab.ai · Feb 6 – 7, 2026
ID: CMLF2QVZM009FBB0SRTG2LHTF
View Certificate ↗

EDUCATION

MS Mathematics
Sep 2021 – Jun 2023

COMSATS University Islamabad — Lahore Campus

CGPA: 3.45 / 4.00

Thesis: Construction of Numerical Scheme Using Python in Neural Field Model

- Developed Python-based numerical models for neural-field simulations.
- Designed algorithms for level-curve intersection detection, threshold extraction, and stability analysis.
- Applied mathematical modeling and numerical computation to analyze complex systems.
